Detailed submission guidelines for Contributed Papers

Guidelines for the creation of your **manuscript**:

- To comply with the **double-blind review process**, uploaded files should be free of any reference to the authors.
- The **title page** (first page) of your manuscript should include the title of your paper, followed by a structured abstract of not more than 300 words, followed by a maximum of five keywords. The structured abstract should include four parts:
  1. **CONTEXT** presents the background and relevance of the research;
  2. **OBJECTIVE** explains the objectives of the research;
  3. **METHODS** provides a brief overview of the materials and methods used;
  4. **RESULTS AND CONCLUSIONS** presents the main results, and the interpretation of those results.
- Please be advised that Contributed paper submissions should not exceed **12 pages, including figures and tables (excluding title page and references)**. Appendices are not allowed.
- Please use a serif font type such as "Times New Roman" or "Computer Modern" (LaTeX's default), font size 12, line spacing "1.5 lines", and normal margins (2.5 cm all sides).
- Manuscripts should be divided into sections, each with number and section heading. Use no more than two levels: sections and sub-sections.
- Footnotes should appear at the bottom of the page where they are inserted.
- Tables and figures should be placed in the text near to their citation. Number tables and figures consecutively. Type captions with an initial capital only.
- A statement needs to be added in which the authors explain how and in which parts of the submitted work AI tools were used.
- For referencing, please refer to the style of the *European Review of Agricultural Economics*. Collect references at the end of the manuscript.

Necessary additional information to complete the online submission:

- Title of the contributed paper.
- Author(s): name, ORCID, affiliation, contact details (for multi-authored paper: indicate the presenting author)
  - Submitting authors will be asked to evaluate other contributed paper submissions.
- Structured abstract (max. 300 words): The abstract included in conftool should be repeated verbatim from your manuscript.
- Keywords (max. 5): should be repeated verbatim from your manuscript.
- Select max. 2 topics and 1 method category that best suit your contributed paper from a predefined list.
- Number of pages of the manuscript (not including title page and references): should not exceed 12 pages.
- Authors need to confirm that this work reports original research and that the conception of the study, scientific analysis, interpretation of findings, and preparation of the manuscript are their own. The authors take full responsibility for all content in this work, including any material produced with the assistance of AI tools. Any use of AI does not diminish the authors' accountability for accuracy, originality,

and ethical compliance. All AI-assisted content has been reviewed and approved by the authors. Authors need to explain how and in which parts of the submitted work AI tools were used.

Detailed submission guidelines for Poster and Research Design Presentations

Guidelines for the **proposal** of your **poster** or **research design presentation**:

We invite you to submit a proposal for a poster or a research design presentation. The poster may contain completed work or work in progress (e.g., early-stage PhD candidates).

- To comply with the **double-blind review process**, uploaded files should be free of any reference to the authors.
- Proposals of either format need to be submitted as a **structured long abstract**. The proposal should not have a separate title page (first page) but rather present the following items in consecutive order:
    - Start with the **title** of your contribution.
    - A short **abstract** (max. 150 words) that gives a clear idea of the problem statement, research question, the methods (to be) employed, and for a poster the main conclusion.
    - A maximum of five **keywords**, separated by commas.
    - Explain in three sentences why the **content** of the submission is **suitable for a visual presentation as a digital poster/design**. Keep in mind that if your proposal gets accepted, you will be able to present a poster/design digitally on **one slide only**.
    - **A problem statement** detailing what issue(s) you are investigating.
    - **Research question(s) and objectives** that explain what the research is trying to achieve, and which contribution(s) are made to the existing literature.
    - **Methods and data**: brief outline of the methodology or the research design, and a brief description of the data used in the research for the poster or the anticipated data collection procedure and sampling for the research design presentation.
    - **Results**: outline of main results and conclusions. (Note: does not apply to the research design).
    - Collect **References** at the end of the proposal. Please refer to the *European Review of Agricultural Economics* style.
    - **Do not add** any extra sections or appendices and **do not use footnotes**.
    - A statement needs to be added in which the authors explain how and in which parts of the submitted work **AI tools** were used.
- Please be advised that submissions should not exceed **4 pages, including figures and tables (excluding references).**
- Please use font type “Times New Roman” or “Computer Modern” (LaTeX's default), font size 12, line spacing “1.5 lines”, and normal margins (2.5 cm on all sides).
- Tables and figures, if applicable, should be placed in the text near their citation. Number tables and figures consecutively. Type captions with an initial capital only.
- In the final presentation, we encourage you to include a QR code with further information (after acceptance of the proposal).

Necessary additional information to complete the online submission:

- Title of the contributed poster presentation/design
- Author(s): name, ORCID, affiliation, contact details
- Abstract (max. 150 words): should be repeated verbatim from your proposal
- Keywords (max. 5): should be repeated verbatim from your proposal
- Select max. 2 topics and 1 method category that best suit your contribution from a predefined list.
- Authors need to confirm that this work reports original research and that the conception of the study, scientific analysis, interpretation of findings, and preparation of the manuscript are their own. The authors take full responsibility for all content in this work, including any material produced with the assistance of AI tools. Any use of AI does not diminish the authors' accountability for accuracy, originality, and ethical compliance. All AI-assisted content has been reviewed and approved by the authors. Authors need to explain how and in which parts of the submitted work AI tools were used.
